January 3, 2026

Ref. no: IKEUF/01/2026/003

Rep.Babajimi Benson,
Member of the House of Representatives,
The Constituency Office,
Plot 48, Ebutte-Igbogbo Road,
Ikorodu, Lagos.

OFFICE OF
HON. BABAJIMI BENSON
13 JAN 2026
RECEIVED

Dear Honorable,

APPEAL FOR URGENT INTERVENTION ON THE PROLONGED POWER CRISIS AFFECTING ERUNWEN FEEDER AND OTHER COMMUNITIES ON SABO INJECTION STATION

We write to you today as representatives of the Erunwen Feeder Electricity Users to first express our profound gratitude for the remarkable developmental strides you have spearheaded towards achieving Energey security in Lagos . Your commitment to actuialising the Lagos State focuies on provding **providing reliable, affordable, and sustainable electricity to its citizens has** significantly improved lives.

However, we must bring to your attention a critical paradox: while your developmental projects are aimed at fostering progress and economic growth, the persistent unwillingness of Ikeja Electric (IE) to improve its equipment is making this growth appear to be a disadvantage to our people. IE continues to attribute the power crisis to "population growth," a narrative that directly negates your goodwill and your mandate on sustainable energy ecosystey development.

The situation across the Erunwen Feeder and other communities attached to the Sabo Injection Station has reached a breaking point. We wish to highlight the following salient points that have left our communities in perpetual darkness:

- Unfulfilled Promises Since 2019: Since 2019, Ikeja Electric has made repeated, yet unfulfilled, commitments to construct a relief injection station at LASPOTECH to alleviate the burden on the Sabo Injection Station. Despite these long-standing assurances, no significant progress has been made.

- Idle 15MVA Transformer: During one of our meetings with the Senior Management (Chief Technical Officer, Chief Commercial Officer, Head of Security etal) at the IE Headquaters in Alausa, it came to our knowledge that a 15MVA relief power transformer, provided by the Central Bank of Nigeria (CBN) to improve this situation, is currently lying idle at IE's headquarters in Ikeja. We understand this is due to IE's unwillingness to fulfill requirements for the land needed for the project.

- Severe Load Shedding and Poor Supply: Currently, over five transformers servicing more than 20,000 households on the Erunwen Feeder are subjected to a grueling "One Day On, One Day

Off" load-shedding program. When this is combined with the general poor supply on the feeder, many communities attached to the Transformers (eg Erunwen Balogun, Ajayi Oronti, Erunwen 1, Oremolu) on load shedding end up getting less than 2 hours of power daily.

- Technical Failures and Community Self-Funding: Residents are plagued by incessant low voltage and "phase loss". In an act of desperation, communities have been forced to contribute money to replace faulty parts and purchase fuse wires for transformers—responsibilities that legally rest with Ikeja Electric.

- Insecurity and Vandalism: This chronic darkness has been identified as a primary driver of insecurity and the increasing rate of transformer vandalism within our communities.

- Exhausted Avenues for Dialogue: We have engaged various stakeholders to no avail. On September 8, 2025, we formally sought the intervention of His Royal Majesty, Oba Kabiru A. Shotobi, the Ayangburen of Ikorodu. We also held meetings with IE leadership and the Ikorodu North Community Development Council (CDC) on May 21, 2025, yet our plight remains ignored.

Honorable Sir , we are being billed for services we do not receive, in fact some other communities attached to Sabo Injection station are under "Band C" classifications while living in darkness. The lack of stable power is stifling the economic potential of the communities in Ikorodu Metropolis and surrounding communities. We humbly seek your intervention to compel Ikeja Electric to deploy the idle 15MVA transformer and fulfill their 2019 promise of a relief injection station.

Attached herewith are copies of some our correspondences on the subject.

We would be willing to further discuss this issue with you at your earliest convenience to provide more details or documentation.

Thank you for your tireless service to Ikorodu.

Ikorodu Electricity Users Forum

Yours sincerely,
